

Make a Stronger Impact for your Non-Profit with Superior Forms, Built with Minimal Coding

www.xelence.com

Stop All Killing (SAK) is an initiative and inspiration by Dada J.P. Vaswani.

The 25th of November, the birthday of Sadhu T.L. Vaswani, a saint and scholar, philosopher and educationist, is declared as International Meatless Day.

On this day, people are requested to refrain from eating meat in recognition of this ideal.

This movement has gathered infinite momentum, and the last few years have seen **pledges from well over 10 million people** across the globe.

Problem Statement

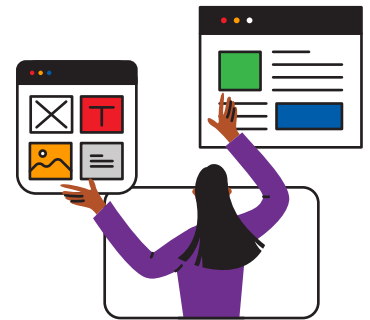

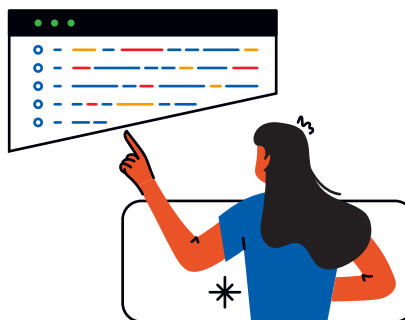

SAK's legacy platform could gather some data but the data analytics only showed some metrics.

Comparing data year on year was a challenge, and customization in the front-end form required time and effort.

The form was not user-friendly and could not integrate well with the backend systems.

Our Solution

Every year Sagitec takes up a few projects as part of our Corporate Social Responsibility (CSR) initiatives where we give back in monetary, time spent, or technical ways.

This project is one of our initiatives where we provided the organization with our technical expertise and effort so they can continue to offer their services to society.

Meatless Day

Pledge to be Veg on November 25

Meatless Day Campaign is an initiative to promote a vegetarian diet.

A compassionate and healthy living, environmental protection, a calmer demeanor are all byproducts of adopting a vegetarian diet.

Pledge

User Friendly Form Built with Low-Code Xelence

We implemented an app for SAK on Xelence that could take in details of the pledge on a user-friendly form.

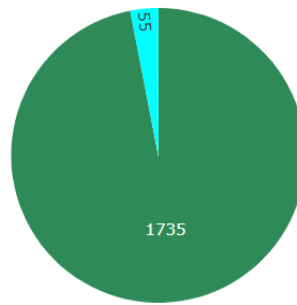

The form uses low-code elements of Xelence, so even non-technical personnel can change the form and its interface by dragging and dropping design elements like fonts, colors, and styles.

Count By Pledge - Overall

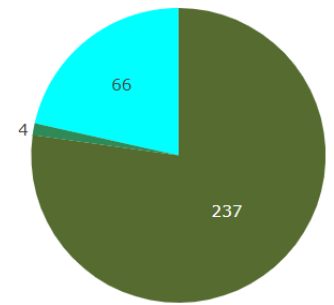

■ I am a Supporter
■ I Pledge to be Vegetarian for 25th November
■ I Pledge to be Vegetarian for Life

Count By Country

■ INDIA ■ ABROAD

Count By Pledge For

■ Self ■ Family ■ School

Easy Reporting and Analytics

The form is also integrated with the backend systems, so admins managing this form can see and analyze all the data.

They can see pledge growth patterns, which part of the world they are coming from, and has queries built in the form that makes getting data and analytics easy.

Xelence is deployed on Azure Kubernetes Service to handle scaling needs automatically.

We completed this project in a few days with just two people working on it in addition to their full-time jobs.

“

“We are thankful to Sagitec for making our pledge form so user-friendly. They created the form on the platform quickly, and we received many pledges. It was a great partnership with Sagitec.”

– Gulshan Dudani, Secretary, SAK Association

”

About Xelence

Xelence is a low-code/no-code platform by Sagitec that helps non-profits and other organizations quickly build small to complex applications with minimal coding. Our comprehensive software development platform offers many features and benefits that can streamline your operations, improve efficiency, and increase transparency.
